SUMMARY

Flutter developer who ships production apps end-to-end — UI, auth, payments, Supabase backends. Shipped a complete multi-feature app in **7 days**; currently sole developer of a marketplace app in pre-release. Proven fast, independent execution. Available immediately for deadline-driven remote work.

EXPERIENCE

Flutter Developer — BuildBazaarX

June 2026 – Present · Construction & interior-design marketplace (DPIIT-recognized startup)

- **Sole developer of the BuildBazaarX Professional app** — complete UI, authentication flow, and Supabase integration; currently in **pre-release**, targeting Play Store publication. (github.com/p4bl0-26/Builder_professional)
- Architected the Flutter client to mirror the production React web platform, in sync with the existing Supabase schema.
- On the **Seller app**: implemented the end-to-end **Razorpay payment flow** and built the authentication flow. (github.com/Rishit0612/BuildBazaarX_app)

PROJECTS

Sortd — Campus Utility App (built in 1 week)

Flutter · Supabase | github.com/Rishit0612/Sortd

- Designed, built, and shipped a complete multi-feature student app in **7 days**.
- Expense tracker and **loan tracker with automated WhatsApp reminders** — messages the borrower automatically on a user-set due date.
- Quiz tracker and a centralized semester study-materials hub.

HACKATHON PROJECTS

Optimus — AI Chief of Staff · Vibe2Ship Hackathon

Next.js · Flutter · Gemini · Supabase

- Shipped a working cross-platform product (web + Flutter) in **48 hours**: AI discovers commitments, predicts schedule risks, and plans execution so users never miss a deadline.

Veritas — Content Authenticity Platform · Nexora'26 Hackathon

Blockchain · AI · Next.js

- Digital-content provenance platform: SHA-256 hashing, on-chain proofs, AI tamper explanations, QR verification in under three seconds.

Decentralized Workflow Engine · LNMHacks

Web3 · Smart Contracts

- Shipped a Web3-based decentralized workflow engine in **24 hours** at my first hackathon.

TECHNICAL SKILLS

Mobile	Flutter (primary), Dart, Android
Backend	Supabase (auth, database, storage), Razorpay payments, SQL, Node.js, REST APIs
Web	React, Next.js, TypeScript, Tailwind CSS
Languages	Dart, C++, Python, JavaScript, TypeScript
AI / Other	Gemini & OpenAI APIs, Web3/Blockchain, Git & GitHub

EDUCATION

B.Tech, Computer Science & Engineering

The LNM Institute of Information Technology (LNMIIT), Jaipur · 2025 – 2029
